CONTENTS

Introduction 3

Chapter 1

GENERAL PROBLEMS OF THE LINEAR THEORY OF INTERNAL GRAVITY WAVES 25
1.1. Basic equations 26
1.2. Planar internal gravity waves in the exponentially stratified medium 31
1.3. Steady-state internal gravity waves and the problem of reflection from planar boundaries 34
1.4. Green function of the equation of internal gravity waves in exponentially stratified medium 39
1.5. Internal gravity waves in a stratified layer of the finite depth 47
1.6. Internal gravity waves in stratified mediums with average shift flows 51

Chapter 2

INTERNAL GRAVITY WAVES FROM LOCAL AND NON-LOCAL SOURCES OF DISTURBANCES IN STRATIFIED MEDIUMS 58
2.1. Local sources of disturbances of internal gravity waves in stratified mediums: formulation of the problem and integral forms of solutions 61
2.2. Asymptotic behavior of solutions for far from local and non-local disturbing sources 67
2.3. Asymptotic forms of solutions in the vicinity of trajectories of movement of sources of disturbances 85
2.4. Asymptotic forms of far and intermediate fields of internal gravity waves in the deep ocean 90
2.5. Asymptotic representations of solutions near the sources of disturbances 100
2.6. Internal gravity waves from non-local sources of disturbances (three-dimensional case) 115

Chapter 3

NON-HARMONIC WAVETRAINS OF INTERNAL GRAVITY WAVES IN NON-UNIFORM AND NON-STATIONARY STRATIFIED MEDIUMS 132
3.1. Basic concepts of the method of geometric optics 135
3.2. Uniform asymptotics of the far field of internal gravity waves in the layer of stratified medium with smoothly varying bottom 144
3.3. Local asymptotics of the far field of internal gravity waves in the layer of stratified medium with smoothly varying bottom 156
3.4. Uniform asymptotics of the fart field of internal gravity waves in stratified non-uniform in horizontal direction medium 166

3.5. Local asymptotics of the far field of internal gravity waves in stratified non-uniform in horizontal direction medium 178
3.6. Local asymptotics of the far field of internal gravity waves in stratified non-stationary medium 186

Chapter 4

CRITICAL MODES OF GENERATION OF INTERNAL GRAVITY WAVES 194
4.1. Internal gravity waves at arbitrary non-stationary movement of the source ... 197
4.2. Critical modes of generation of internal gravity waves 201
4.3. Internal gravity waves near the sources of disturbances at critical modes of generation 207

Chapter 5

NON-SPECTRAL METHODS OF ANALYSIS OF THE IN SITU MEASUREMENTS OF INTERNAL GRAVITY WAVES 212
5.1. Main ideas and methods of spectral analysis of internal gravity waves 214
5.2. Non-spectral methods of the analysis of measurements of internal gravity waves in the Western Sahara shelf region 224
5.3. Non-spectral and spectral researches of propagation of tidal internal gravity waves on the example of the experiment "Mezopolygon" (tropical part of the Eastern Atlantic) 233
5.4. Single out of the wavetrains of internal gravity waves on the background of heavy interferences in compliance with the results of the in situ measurements in the Black sea 244

Appendix A

NUMERICAL METHODS OF SOLUTION OF FUNDAMENTAL VERTICAL SPECTRAL PROBLEMS 253

Appendix B

MODIFIED GREEN FUNCTION OF THE EQUATION OF INTERNAL GRAVITY WAVES IN THE LAYER OF STRATIFIED MEDIUM WITH CONSTANT AVERAGE FLOW 262

CONCLUSION 284
